Abstract

The concept of a Decentralized Sovereign Organization (DSO), would be powered by the masses by definition— a Universal Value System of all Public Brands, Businesses, & Interconnected Services, would be a Decentralized standard globally. All parties interested in participating, or creating their own projects, would now be able to do so easily through tokenization, & with no need of a middleman controlling their process.

The socioeconomic benefits, typically exclusive to large private firms & the upper class, would be garnered by the entire world's citizens now. **OSIS makes this possible**, for less than a fraction of the cost & time.

OSIS embodies the Strength in Numbers ideology

What is OSIS?

OSIS is a Utility Token & the First platform that is applying Tokenization to everything it's doing, at a mass scale.

OSIS is the sovereign currency that is used for transactions within the OSIS ecosystem & exchange.

Backed By

MASTERBLOX™

How to get involved

01 | Get some OSIS

- Go to *MEXC.com* or *Bitmart.com* to get OSIS;
- Get as much OSIS as you like. OSIS tokens are the sovereign currency of Apotheosis. They can be used to buy products, brands & services, from other tokenized projects & platforms.

02 | Join the Ecosystem

- Get full access to the OSIS ecosystem, as well as other web3 platforms using your OSIS tokens.

1000 OSIS	MetaBadge NFTs. Votes with ArchAngel status
5000 OSIS	Become an Ascended ArchAngel
10000+ OSIS	5 Rare MetaBadges & access to strategy meetings with OSIS Team

How to get involved

03 | Become a Web3 Pro

- OSIS University - Learn the fundamentals of Web3 on OSIS' Youtube Channel;
- Learn how to identify real projects from fraudulent ones;
- Get the best practises to be 100% secure in Web3;
- Follow the curriculum from blockchain 101, to courses behind using tokenization.

04 | Be a part of the Change

- Tokenize projects & assets using OSIS Tokenizer;
- Discover OSIS ecosystem & applications;
- Join the conversation & community;
- Read “Blockchain for Idiots”, an introduction to Web3 that'll help get you on your feet & start running in this industry.

Apotheosis Blueprint

Anyone can easily build on the OSIS Core infrastructure/ ecosystem. All OSIS applications are cross-compatible, running on the Polygon network with fast transactions & the lowest fees in Web3.

Ecosystem

01 | OSIS Tokens

OSIS is the utility token behind the education, tokenization, & ecosystem that offers users the ability to launch their own NFTs & tokens. As a sovereign currency, OSIS tokens can be used for many things within the OSIS ecosystem, as well as in all projects that tokenize using OSIS technology.

02 | MetaBadges

MetaBadges are NFTs that give holders a voice in the OSIS world. Each holder is entitled to a vote, according to the rarity of their MetaBadge. Holders are actively involved in the quarterly decisions of OSIS, & contribute to its activities.

03 | OSIS Profile

Take Control of Your Data and Identity: Secure your Web3 Domain and gain full ownership of your online presence. OSIS Profile empowers you to customize and monetize your digital identity, allowing you to earn ad-share revenue and unlock new opportunities in the decentralized web.

Ecosystem

04 | OSIS Tokenizer

OSIS has created a proprietary token generation system that allows users to create smart contracts as easy as a few clicks. Anyone can make their own digital currency token (ERC20) or NFT project (ERC721), manage tokenized assets & smart contracts, which they can further list on the OSIS Exchange. No coding required, the lowest cost in Web3, & it is globally accessible. By Tokenizing the World, we can create a barter system based on service & true utility, determined by the masses.

05 | OSIS Exchange

The OSIS Exchange will be a place where users can freely barter their digital and real world assets. OSIS' vision is to shape a society where community members are appreciated in full for the products and services they bring to ecosystems they live in. With tokenization in decentralized marketplaces, all parties have a voice.

Ecosystem

06 | OSIS Vault

100% end-to-end encrypted cloud storage system that can securely transfer & store large files. Like Dropbox, but truly private. This is a backbone to all OSIS platforms.

07 | OSIS Mail

100% end-to-end encrypted Web3 email platform that enables true anonymity & privacy. OSIS Mail will also offer a revenue share feature with users for ads.

08 | OSIS Core Wallets

OSIS Core Wallet is designed to make your Web3 experience smooth and accessible. With its easy-to-use interface, you can securely hold and trade dozens of digital currencies effortlessly. Core will be available on iOS & Android.

Ecosystem

09 | NFT Domains

By getting NFT Domains directly in OSIS Core Wallet, members will take the leap into decentralization, with their own piece of the blockchain universe (AKA Metaverse). With an NFT domain, anyone can both secure & simplify all their crypto wallet addresses into a single domain (i.e. yourname.x). Domain holders only pay once & can keep a Domain forever with no renewal fees. Websites can also be hosted on this domain.

10 | OSIS University

Education is a foundational part of OSIS' mission. OSIS offers economic, technological, Web3, and more education for all members for Free. In the future, OSIS plans to incentivize members to study & get OSIS University NFT degrees.

OSIS Exchange

OSIS Exchange is a Decentralized marketplace where anyone, from anywhere, can list their assets or likeness. People from anywhere can contribute to the progress of any listed asset or likeness through voting with our OSIS currency or MetaBadge, investing with other currencies, & other creative means.

Exchange Voting

Vote with up to 100 OSIS a Month

Community votes qualify all projects that request to be listed. Once qualified, members of the exchange can buy into the projects swapping various currencies with OSIS.

OSIS Exchange

All members who vote in a successful listing, will receive the opportunity of first purchase/swap of the new token prior to open listing, including MetaBadge holders. “First dibs”.

MetaBadge owners may only vote with one MetaBadge per token applying for listing every month.

Standard MetaBadge = 100 Vote weight

Rare MetaBadge = 200 Vote weight

Super Rare MetaBadge = 2200 Vote weight

The total number of times you can use a MetaBadge to vote across the OSIS Exchange is 100 times per month.

What is Tokenization?

Tokenization is the splitting of anything physical or digital, into ownable assets (tokens) on the blockchain.

Real Estate
Building

Tokenized into 10
Million tokens, or
digital assets

1 Million people buy
10 tokens each at
\$10 per token =
\$100M Valuation

Other Trillion \$ Markets that can be Tokenized

Any Brand,
Business or Creator

NFts

Entertainment
Music, Film & more

What is Tokenization?

Tokenization - Decentralization

In contrast to the traditional method, a brand or business is actively supported by the community members who may use, & hold their currency. Growth and progress can be achieved without the troubles of a middle party. If the people believe the product is useful to them, the tokenized project or individual will receive both market validation and other lasting benefits.

Tokenization is already here

The Tokenization Market is projected to be greater than \$544 Trillion in less than 2 decades. OSIS believes the tokenized economy will be worth much more.

Tokenization in Sports

The Brazilian soccer club Vasco da Gama had been working with KPMG since 2018 on the possibility of using cryptocurrency. After partnering with MBDA for their own tokenization project, each token will correspond to a portion of the transfer fees relating to 12 players educated & trained in Vasco's academy. The project aims to offer fans the opportunity to contribute financially to the club and enable token owners to obtain financial returns relating to the transfers of the 12 players. Vasco projects a potential total of R\$50 million (\$9 million) to be earned over the next couple of years by all token owners combined.

Tokenization in Real Estate

For an industry that has seen historically minimal innovation over the last century, real estate is ripe for disruption through digitization.

Today, individuals around the globe can buy into the real estate market through fully-compliant, fractional, tokenized ownership; powered by blockchain. A company that is at the forefront of this is RealT, with access to the RMM platform, through a special partnership with Commutatio Holdings Limited, RealToken holders can come together to create a whole new paradigm of decentralized ownership (regular housing price vs tokenized price).

MetaBadges

10,000 Fine Art NFTs with a VOICE & VOTE

MetaBadges

ArchAngel Status

MetaBadge holders receive the status of Archangel, as our most involved community members.

Voting Power

Holders get a 100:1 Voting Power in the OSIS Exchange, awarding more influence & opportunity than all standard users.

Staking Rewards

MetaBadges get Staking Rewards & earn MBGs which can be redeemed for reward tiers, including OSIS Gear.

MetaBadges

OSIS Guidance

ArchAngels can get exclusive business guidance & consulting from OSIS Team at no extra charge.

Free Tokenization

All MetaBadge holders are entitled to Tokenize a project for FREE using OSIS' technology.

Free NFT Domain

Holders are entitled to their very own NFT Domain for Free.

Tokenomics

TOTAL - 100 Million Fixed

OSIS Revenue Streams

Tokenization

OSIS Tokenizer is a tokenization platform that charges \$5.00 per-use for creating a verified, new smart contract (currency or NFT). This figure includes revenues from Ethos' user base tokenizing individual tickets as memorabilia, costing them an additional \$1 when they buy event tickets.

Subscriptions

Tokenized assets require a place to be stored & organized securely. As such, users may subscribe to OSIS Vault to get more storage capacity, creating more revenue while directly benefiting from its services.

NFTs

OSIS MetaBadges is a 10,000 NFT project that is central to the OSIS Ecosystem & Exchange; hence is desirable & has high utility. All secondary sales of MetaBadges reward OSIS with 10% royalties revenue.

Txn Fees

OSIS will get a small & standard marketplace fee (under 1%) for every transaction on the platform. The OSIS token will be used to pay transaction fees on each transaction, similar to BNB on its platform.

OSIS Revenue Streams

IDOs

Initial DEX Offering (IDO) is a feature of the OSIS Exchange where tokenized projects can publicly raise funds from the OSIS community in a safe & decentralized way. OSIS captures a 10% fee from funds raised on the platform.

NFT Domains

In partnership with Unstoppable Domains, OSIS receives a 30% revenue share on all NFT Domains sold in OSIS Core. NFT domains simplify the web3 experience; allowing you to receive hundreds of digital currencies to a single, human readable domain, unique to each user.

OTC Services

OSIS has secured access to liquidity pools to provide customers the service to purchase bulk digital currency at the lowest prices globally. OSIS' partnerships enable it to provide any amount of digital currency to its clients at spot market rates with fees of 2% - 4% on trades with no slippage.

Financial Projections

K = Thousands M = Millions

Stream	2024	2025	2026	2027	2028
