# Problem.

**Seller issue -** Tokenization is expensive. It's even more expensive to publicly list your project, let alone market it to find your target audience.

**Consumer issue -** It's difficult to identify legitimate Web3 projects. If the projects are fraudulent or scams, people usually lose everything they put into that project, & sometimes more.

OSIS

# Solution.

**Give creators affordable Web3 tools**

Save time & money with OSIS' no-code tokenizer.

Generate verified smart contracts in under 1 minute.

**Manage Tokenized assets with OSIS dashboard**

Gain exposure & raise capital on OSIS Exchange.

**Give consumers the ability to whistleblow**

They can communicate openly, invest in, & vote for legit projects to be listed in the OSIS Exchange; all in one place. Frauds are delisted & cancelled by the power of community votes & exposé.

**OSIS is making a Web3 Google with an Exchange**

# Why do all this?

OSIS sees the **$500M+ in yearly crypto fraud** as an insult to communities that represent this new industry & asset class.
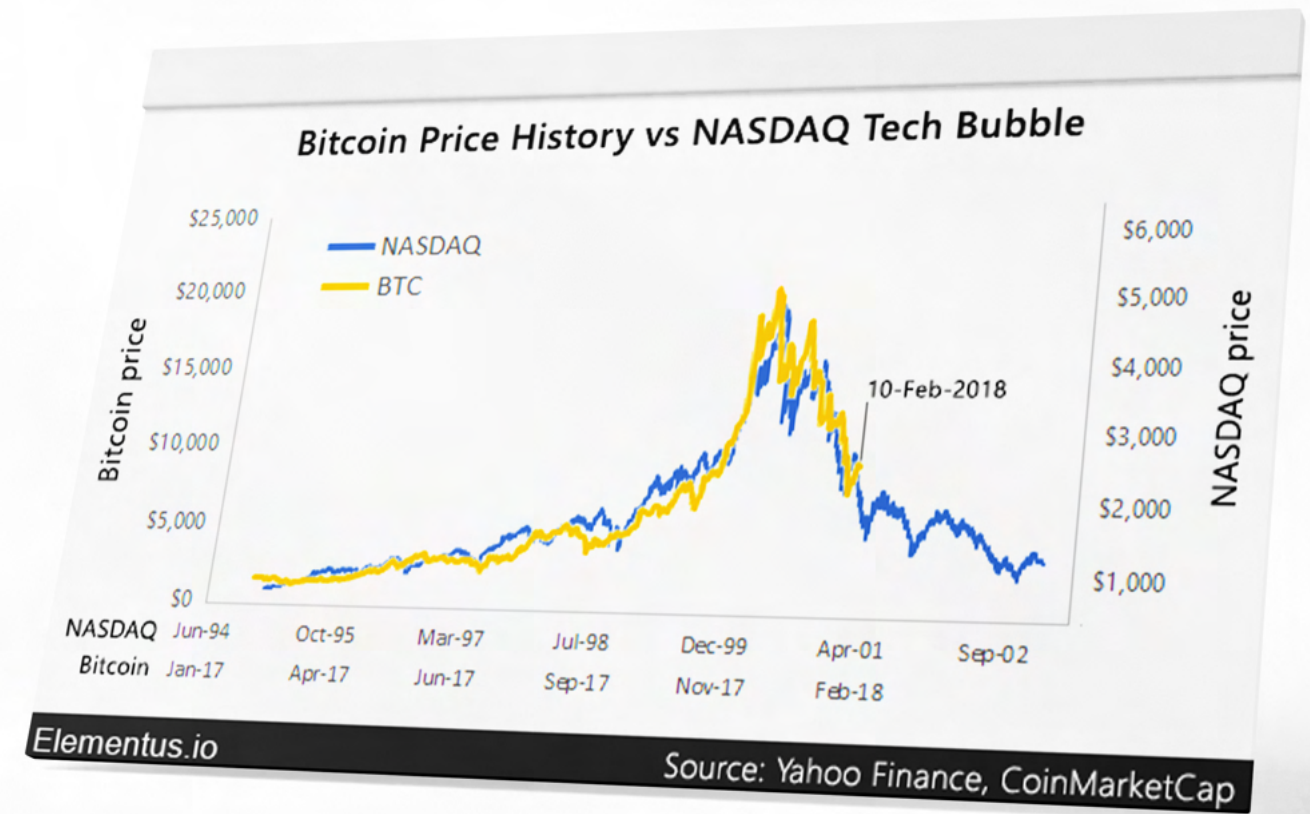

**Web3 is not learning:** Crypto scams have surged by 23% in 2023 vs 2022.

OSIS

# Why is this important?

## *Someone has to do it.*

The OSIS team has learned from the mistakes of the dot com crash.

Top exchanges are making too much money to care for better user experience. (Market size)

Bitcoin Price History vs NASDAQ Tech Bubble

**OSIS is creating a new type of decentralized exchange that could initiate the biggest boom in growth since Google did in the early 2000s.**

# Quick facts.

In 2022, over 80 million crypto wallets exist, compared to 5.78 million in January 2016. Growing over 1300% in 6 years, projected to grow over **230% new people entering the industry each year.**

With a weak user experience & security, there was more than **$3.8 billion lost** by users in 2022 alone, not including the FTX scandal.
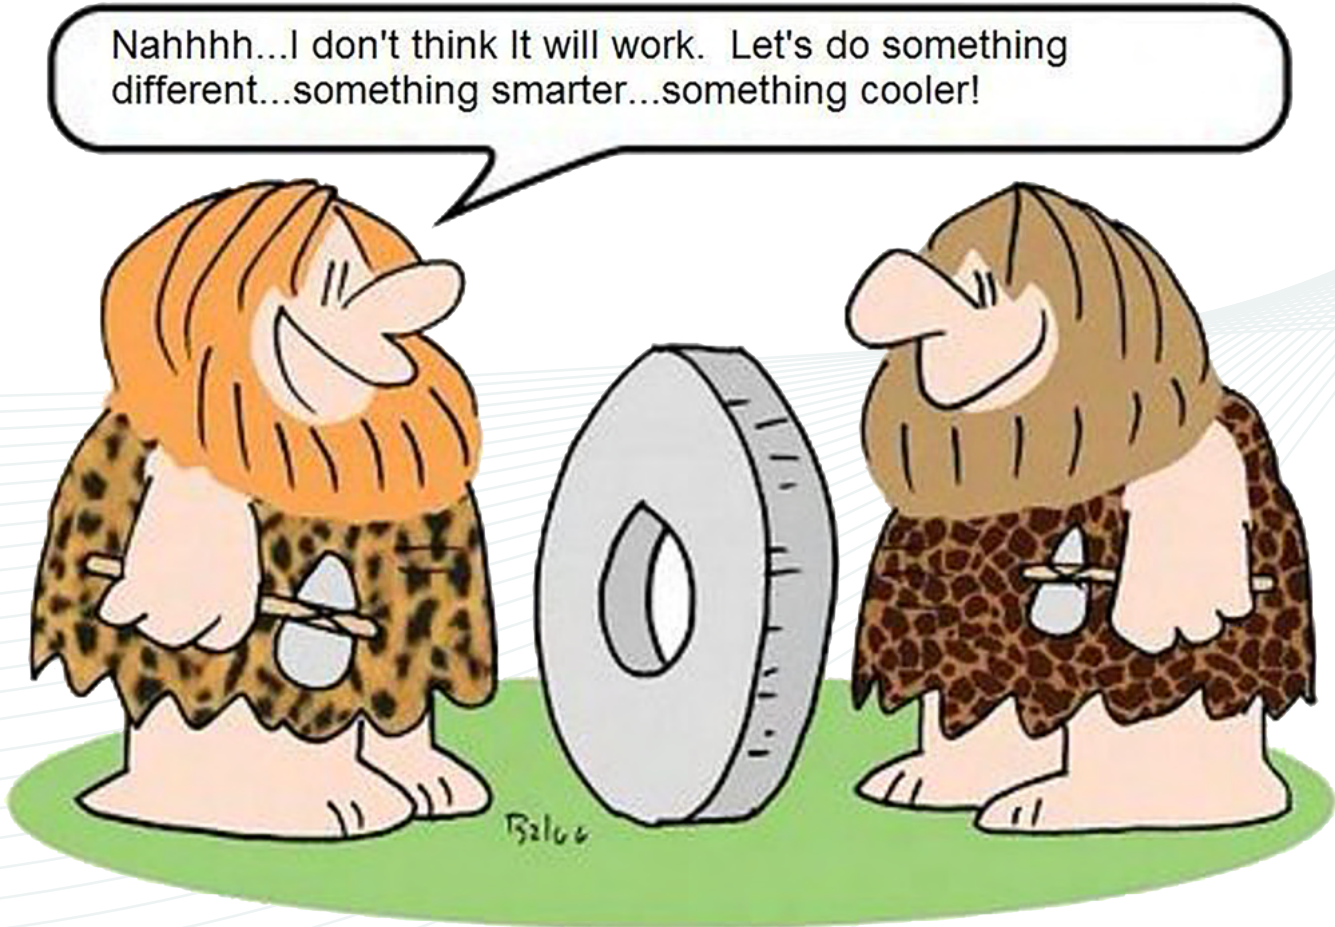

OSIS believes it can reduce this amount by starting a new, responsible type of exchange that brings more **community involvement, security & tools** into existing exchange infrastructure.
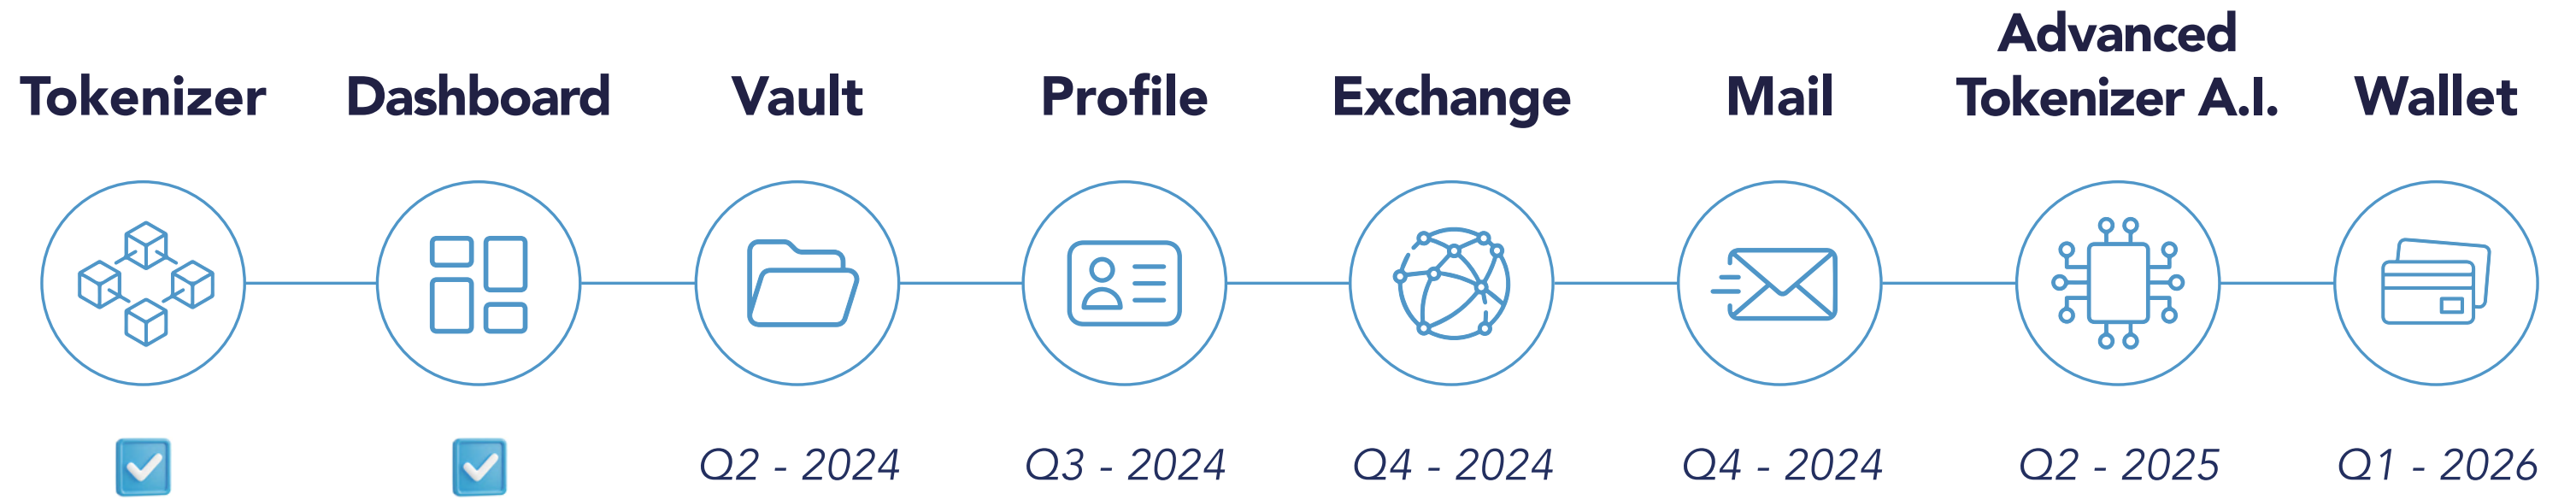

# How do we do this?

*Adding rubber to the wheel*

We are building a **Web3 exchange** focused on democracy, searchability & security between its members

# RoadMap.

| Tokenizer | Dashboard | Vault | Profile | Exchange | Mail | Advanced Tokenizer A.I. | Wallet |
|-----------|-----------|-------|---------|----------|------|-------------------------|--------|
| ✅ | ✅ | Q2 - 2024 | Q3 - 2024 | Q4 - 2024 | Q4 - 2024 | Q2 - 2025 | Q1 - 2026 |
# Competitors.
